DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II, claims 21, 22, 25-27, and 29-32 in the reply filed on 01/10/2005 is acknowledged. Claims 1-20, 23, 24, and 28 have been withdrawn.
2. Claims 25-27 and 29-32 have also been withdrawn from consideration because they are dependent upon the withdrawn non-elected claims.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Line 14, "said payment module" lacks antecedent basis; line 18, "the information" and "the distribution" lack antecedent bases. It is not distinct which "information" and "distribution" Applicant is referring.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tedesco et al. 6,085,888.

Tedesco '888 discloses a vending machine and method for vending plurality of products per claimed invention. The method comprises a) providing entry of a user's ID via any ID means; b) validating of the ID by the computer system's micro-controller; c) entering selections of articles; d) verifying the availability of the selected articles; e) providing respective price for the selected articles (Figures 5 and 6); f) calculating the total cost for the selected articles; g) displaying the total charge for the selected articles; h) initiating payment mode after user's agreement to the total price for the selected articles; i) payment module initiating charge provided by the user; j) obviously connecting to a banking authority to verify sufficient fund, if credit card or magnetic card is used; k) charging user's payment means, after the banking authority verified of sufficient fund; l) printing sale receipt for the user; m) initiating the dispensing of selected purchased articles.

In regards to claim 22, many article selections are possible for the same sale.
